

FRANKLIN

GATES AND GATE HARDWARE

FRANKLIN HISTORY

Franklin gate systems were established over 60 years ago. From day one the goal has been to continuously meet customers' needs through a focus on innovation, quality and customer service. Franklin works closely with field representatives and farmers to ensure this goal is met.

Franklin's commitment to ongoing research and development ensures products are specifically designed with a practical understanding of farmers' requirements. Franklin Gates and Gate Hardware are strong, reliable and fit for your farm.

FETTLING

Dangerous edges are removed in the final stage of production by fettling. This gives a smooth and high quality finish.

ONE PIECE ADJUSTABLE GATE CLAMP

For improved strength and longer life, one piece adjustable clamps are added to the top and bottom of selected gates.

FLAT VERTICAL STAYS

To add maximum strength to the infill of the gate - the Franklin Kiwimaster, Fieldmaster and Stockmaster gates all have flat vertical stays welded to their frames.

FRANKLIN GALVANISED GATES

INSIST ON FRANKLIN GATES FOR:

A COMPLETE RANGE - 10 different gate models to suit a wide range of farming situations.

GOOD PRACTICAL DESIGN - for easy hanging of gates.

STRENGTH AND DURABILITY - strong yet light to hang with 25mm pipe frame, solid rod, flat infill and adjustable clamps allowing for gateway movement.

NZ MADE PRODUCT - manufactured to strict design specifications and tolerances, using top quality New Zealand steel.

RUST FREE - fully hot-dip galvanised to prevent rust and keep the gates looking good year after year.

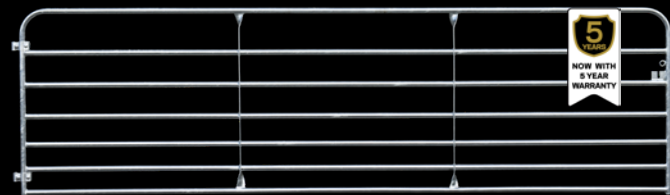

5 YEAR WARRANTY - from 1 October 2018 a market leading 5 year warranty was introduced on all Franklin gates and gate hardware.

BUFFALOMASTER

EXTRA HEAVY DUTY GATE

The heaviest, strongest Gallagher gate is ideal for farming situations where maximum strength is required. Often used on boundaries, around yards and raceways where higher levels of stock pressure are likely to occur.

- 25mm nominal bore pipe frame
- 5 x 25mm nominal bore pipe horizontal bars
- 50mm flat support uprights
- 2 x 20mm heavy duty adjustable hinge clamps top and bottom
- Split link latch attachment
- Fully hot-dip galvanised

	LENGTH (ft)	LENGTH (m)	HEIGHT (m)
F4212	12	3.66	1.05
F4214	14	4.27	1.05

*Made to order

BULLMASTER

EXTRA HEAVY WEIGHT GATE

The heaviest, strongest Franklin gate is ideal for farming situations where maximum strength is required. Often used on boundaries around yards and raceways where higher levels of stock pressure are likely to occur.

- 25mm nominal bore pipe frame
- 5 x 20mm nominal bore pipe horizontal bars
- 40mm flat support uprights
- 2 x 9.5mm diagonal support bars
- 2 x 20mm heavy duty adjustable hinge clamps top and bottom
- Split link latch attachment
- Fully hot tip galvanised inside and out

	LENGTH (ft)	LENGTH (m)	HEIGHT (m)
F4110	10	3.05	1.05
F4112	12	3.66	1.05
F4114	14	4.27	1.05
*F4115	15	4.57	1.05
*F4116	16	4.88	1.05

*Made to order

STOCKMASTER

HEAVY WEIGHT GATE

A heavy duty gate designed for containing bulls or heavy stock loading areas.

- 25mm nominal bore pipe frame
- 6 x 9.5mm horizontal bars
- 25mm flat support uprights
- 7.5mm diagonal support bar
- 2 x 20mm heavy duty adjustable hinge clamps top and bottom
- Split link latch attachment
- Fully hot tip galvanised inside and out

	LENGTH (ft)	LENGTH (m)	HEIGHT (m)
F3310	10	3.05	1.05
F3311	11	3.35	1.05
F3312	12	3.66	1.05
F3313	13	3.96	1.05
F3314	14	4.27	1.05
F3315	15	4.57	1.05
*F3316	16	4.88	1.05
